

2016.5.5 update

Hi, guys~

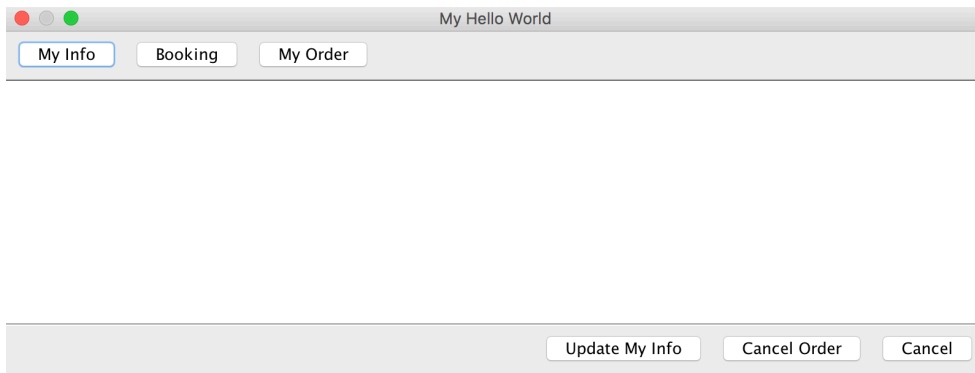

This is the introduction of new update with commit “add new frame-05/05” .

1. UserHome.class:

Add the connection between “booking” button and reserve part.

It still need add three methods:

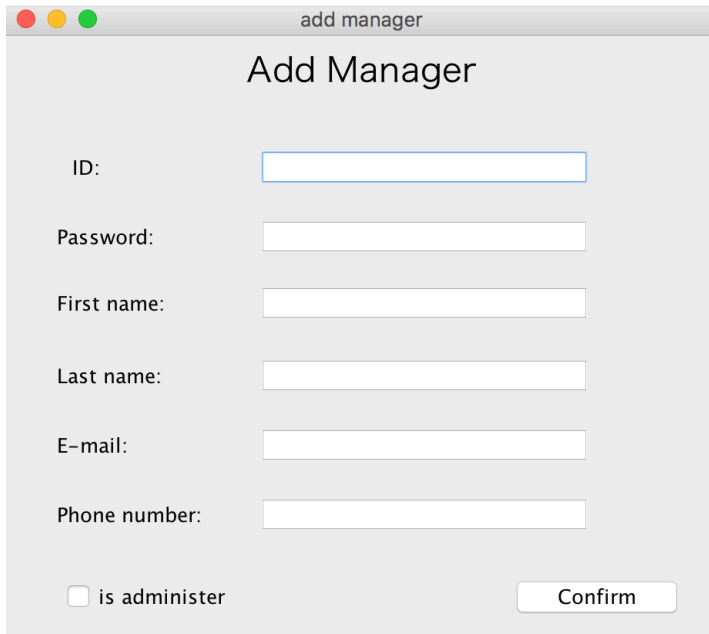

getFirst_name(); getLast_name(); getPhone();

2. addManager.class

This is a new class which just have been added. It is connected with “add Manager” button of ManagerHome.class.

Function: administer can add new manager.

A dialog box titled "add manager" with a title bar containing red, yellow, and green window control buttons. The main title is "Add Manager". It contains several input fields: "ID:" (a small rectangular box), "Password:" (a standard text box), "First name:" (a standard text box), "Last name:" (a standard text box), "E-mail:" (a standard text box), and "Phone number:" (a standard text box). At the bottom left, there is a checkbox labeled "is administrator". At the bottom right, there is a button labeled "Confirm".

add manager

Add Manager

ID:

Password:
