

## Reservation part

Hi, guys~

This is the periodical introduction of the reservation part of our project

1. homepage:

Function : Get location, check in time, check out time.

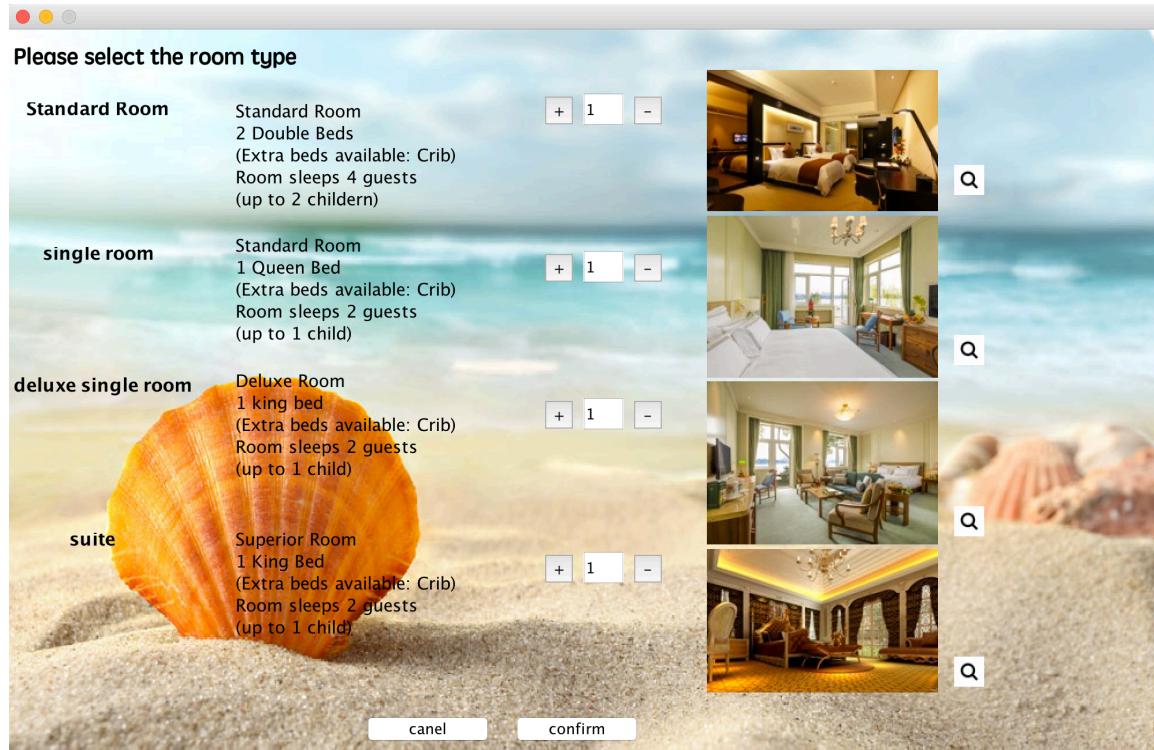

we expect to get location and date information from this page and it could be used

by posterior pages.

## 2. Select page

Function: get room type and amount.

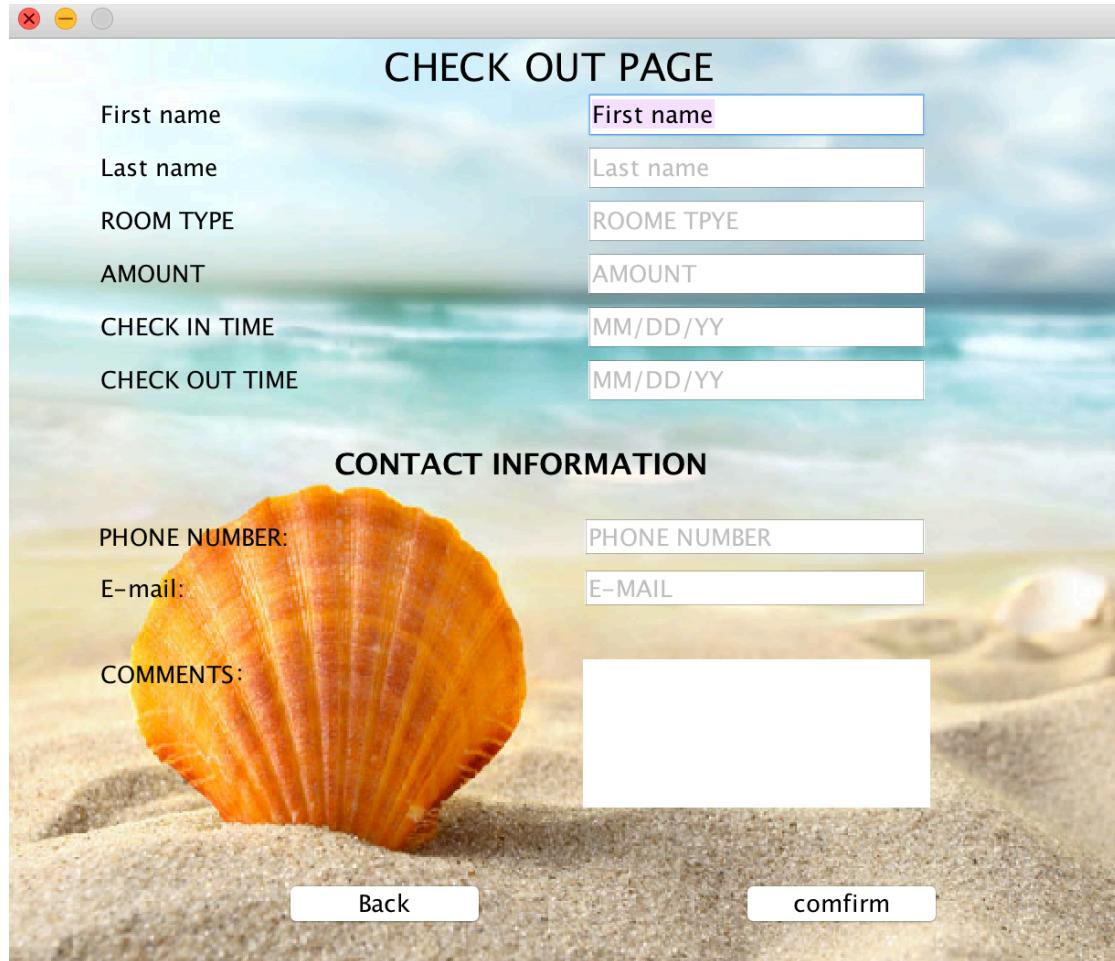

we want to get room type and room amount from this page and it could be used by posterior pages.

3. Check page

Function: confirm information about user name, room type, amount, check in date,

check out date, phone number, e-mail and add comments.

**CHECK OUT PAGE**

First name	<input type="text" value="First name"/>
Last name	<input type="text" value="Last name"/>
ROOM TYPE	<input type="text" value="ROOME TPYE"/>
AMOUNT	<input type="text" value="AMOUNT"/>
CHECK IN TIME	<input type="text" value="MM/DD/YY"/>
CHECK OUT TIME	<input type="text" value="MM/DD/YY"/>

**CONTACT INFORMATION**

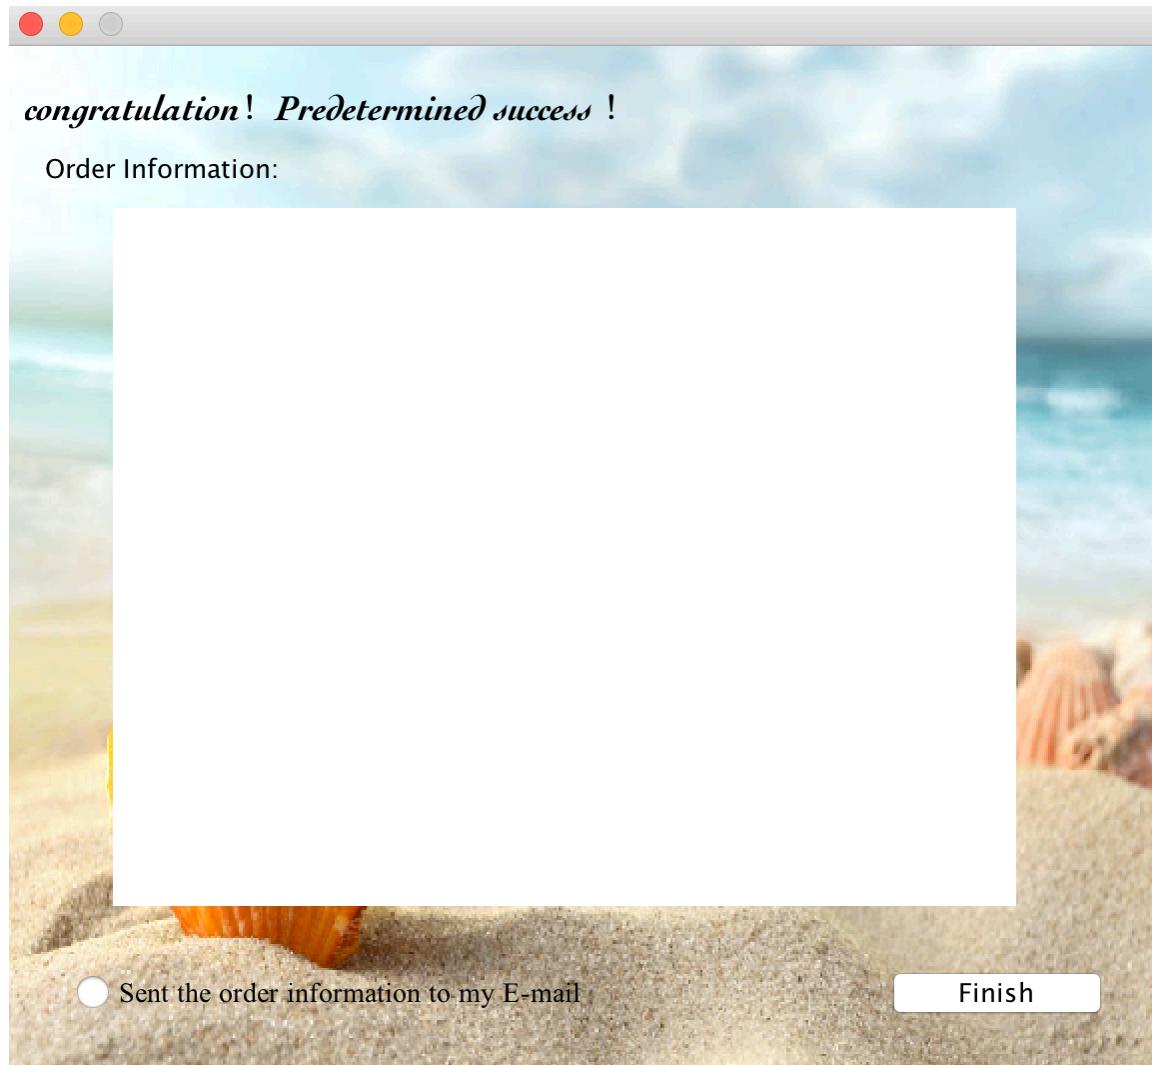

PHONE NUMBER:	<input type="text" value="PHONE NUMBER"/>
E-mail:	<input type="text" value="E-MAIL"/>
COMMENTS:	<input type="text" value=""/>

**Buttons:**

Back      comfirm

#### 4. Result page

Function: show all information of this reservation by JList and send it to user's mailbox(extra function).

now we have finish the base function of that part and try to connect this part with log in part.
